

Chipper Anvil

Lower operating cost
Less down time/fewer anvil changes
Easy to maintain
Eliminates need to rebuild

Replaceable 2-sided inserts made from D2 tool steel last 2 to 3 times longer than traditional anvils.

Anvil holder manufactured from A514 for longevity. Holder provides support for replaceable D2 inserts.

Advanced anvil design with replaceable wear parts is easy to maintain in-house, and eliminates the need/costs associated to rebuilding.
